OBJECTIVE

Senior Mobile Engineer with 5+ years of experience building and shipping production apps in Flutter, native Android (Kotlin, Jetpack Compose) and native iOS (Swift, SwiftUI), backed by hands-on .NET backend experience. Delivered 15+ applications, including government apps for Saudi entities (Ministry of Finance, Ministry of Tourism, Digital Government Authority) and a secure fintech investment platform. I design modular Clean Architecture codebases, build real-time features with SignalR, and bring security, automated testing (up to 90% coverage) and CI/CD into every release. Seeking a senior or lead mobile role where I can own architecture and help a team ship high-quality products at scale.

PROFESSIONAL EXPERIENCE

Flutter Developer

Riadiat

09/2026 – Present

Senior Mobile Developer

Perfect Presentation (2P)

04/2026 – 06/2026

Smart Village

- **Architected the perfect_logger package**, a custom Flutter library built on Dio and SignalR that centralizes production observability and real-time error tracking.
- **Led key ERP mobile features**, resolving critical bugs and refactoring legacy code while coordinating with UI/UX and Business Analysis teams to streamline delivery.
- **Engineered real-time features for enterprise chat applications** using SignalR, ensuring low-latency event synchronization across mobile clients.

Senior Mobile Developer

Sure Global Technology

10/2023 – 04/2026

Nasr City, Cairo

- **Rebuilt the Madar HR self-service app from scratch in Flutter** after assessing the legacy codebase as unmaintainable, taking the rewrite to ~90% completion on a modular Clean Architecture (common, domain, data, di packages) with BLoC/Cubit and Retrofit/Dio, covering 17 modules including attendance, leaves, overtime, permissions, business missions, transfers, training, certificates and root detection.
- **Built the NCGR Android app for the Saudi Ministry of Finance** (National Center for Government Resources Systems) with Jetpack Compose, Flows, Paging 3 and Hilt on Clean Architecture, reaching **90% unit-test coverage** with MockK.
- **Developed the MT Android app for the Saudi Ministry of Tourism**, adopting Jetpack Compose for a modern, maintainable UI.
- **Delivered the DGA Android app** for the Digital Government Authority and the **BOE Android app** for Saudi regulations.
- **Developed the NCA app in Flutter**, plus a .NET mock API that let the team test every request and response before the real backend was ready.
- **Partnered with UI/UX designers and cross-functional teams** to turn wireframes into consistent Flutter and native Android interfaces for complex client requirements.

Senior Flutter Developer

PFI (Part-time)

10/2024

Remote

Flousy — Smart Investment Platform (Flutter, iOS/Android): a fintech app for discovering, understanding and investing in financial funds, with portfolio tracking, market insights and AI-assisted decisions.

- **Led end-to-end delivery of the production Flutter app** on a modular Clean Architecture split into separate Dart packages (domain, data, di, common), with BLoC/Cubit and GetIt across authentication, funds, orders, wallet and notifications.
- **Built a secure networking layer** on Dio with unified error/result handling, token-based auth flows and SSL pinning, plus biometrics, root detection and secure local storage.

- **Set up CI/CD** with GitHub Actions and Jenkins/Azure pipelines, dev/prod flavors and release hardening (obfuscation, split debug info), distributing builds through Firebase App Distribution.
- **Integrated Firebase Crashlytics and FCM**, local notifications and deep/universal links for transactional navigation, improving reliability and engagement.

Senior Mobile and Software Developer

04/2024 – present

Freelance

- **Build and maintain Flutter apps for Android and iOS** for clients, focused on performance, stability and a smooth user experience.
- **Deliver .NET backend work** and integrate it with the mobile apps it serves.
- **Work directly with clients** to turn business needs into custom solutions, running several projects in parallel to tight deadlines.

Part-time Flutter Developer

04/2023 – 03/2024

Deals

Remote, Kuwait

- **Developed and maintained the Hojozat reservation app** in Flutter, used by owners and clients to manage bookings and assets.
- **Kept the booking flow reliable and easy to use**, shipping fixes and improvements across the app's reservation and asset management features.

Senior Software Engineer

02/2023 – 10/2023

Celltek

Cairo, Egypt

- **Delivered 2 Flutter apps** to client requirements, with strong performance and a clean user experience.
- **Built a Messenger chatbot in JavaScript** that automated customer support and improved engagement.
- **Developed a responsive website in vanilla JavaScript**, keeping the code simple and fast.
- **Resolved complex technical issues** across several concurrent projects while meeting strict deadlines.

Software Engineer

08/2021 – 08/2023

Arab Resource Group (ARG)

Cairo

- **Designed, built and published iOS and Android apps**, and a Flutter desktop POS app for the company.
- **Led the team on specific features** and supported the Android developers, working closely with backend, UI/UX and QA teams.
- **Managed Azure deployments**, tuning performance while keeping hosting costs down.
- **Maintained company .NET projects** and helped prepare proposals that matched solutions to prospective clients' needs.

EDUCATION

Bachelor of Information Systems Department of Information Systems Faculty of business administration

06/2016 – 01/2020

Misr University For Science And Technology

SKILLS

.NET

C# - ASP.NET Core Web API - EF Core (Code First) - SQL Server - Clean Architecture / N-Tier - CQRS & MediatR - Repository & Unit of Work - SignalR - Identity, Authentication & Authorization - FluentValidation - AutoMapper - Localization - Push Notifications - Azure

Flutter

Dart - BLoC/Cubit - Provider - GetX - GetIt - Clean Architecture (modular packages) - Dio/Retrofit - RESTful APIs - Firebase (FCM, Crashlytics) - Realm - SharedPreferences/GetStorage - Localization & RTL - Isolates - Google Maps & Geolocation - Payment Gateways - Push Notifications - End-to-End Encryption - SSL Pinning & Security - Unit/Widget Testing - CI/CD (GitHub Actions)

Android

Kotlin - Jetpack Compose - XML Views - MVVM - Clean Architecture - Hilt - Coroutines & Flow - Paging 3 - Jetpack Navigation - Retrofit - Room/Realm - View Binding - Activity/Fragment Lifecycle - Unit Testing (JUnit, MockK)

iOS

Swift - SwiftUI - UIKit - Combine - MVVM - CoreData - Realm - Alamofire - RESTful APIs - Push Notifications - UserDefaults - ViewController Lifecycle - TestFlight & App Store release

Common

OOP - SOLID - Generics - Design & Architectural Patterns - Dependency Injection - Unit Testing - Git - Agile/Scrum - Figma-to-code

PROJECTS

PerfectOrder

Full-Stack POC · ASP.NET Core, EF Core, SQL Server, SignalR

- **Built a collaborative order management API** with ASP.NET Core, EF Core and SQL Server to explore advanced backend architecture.
- **Implemented real-time synchronization** with SignalR, using MediatR to decouple business logic from event-driven notifications.
- **Designed a feature-based architecture** with the repository pattern, image handling and a workflow-driven order status (from collection to closure).
